ICONICS
Reporting Tools Comparison

APPLICATION NOTE

October 2015

Description: This Application Note is a guide to the different ICONICS reporting tools to help you choose the reporting tool that is right for your project.

Features & Basic Information			
	ReportWorX Express	**ReportWorX**	**TrendWorX32 Reporting**
Description	ReportWorX Express is a lightweight Excel plug-in that allows the user to pull in data from a variety of data sources.	ReportWorX is a fully-featured reporting tool, designed to report on a variety of data sources from ICONICS products, databases, and more. Reports can be scheduled or triggered manually via the Unified Web Interface.	TrendWorX32 Report is a small application that comes with GENESIS32 designed to report on data logged by TrendWorX32 Logger or TrendWorX64 Logger.
Pricing & Availability	Included at no charge with all GENESIS64 and AnalytiX products. Available as no charge separate installation for BizViz and GENESIS32.	Purchase separately, installed from BizViz disk. Priced by Active Report.	Included in GENESIS32 and TrendWorX32 at no charge.
