

Medical Telecare Terminal (ONYX Series)

The portable Mobile Telecare Assistant integrates a digital camera, GSM, & WLAN capabilities all in one compact handheld device. The sturdy ergonomic design and Intel Atom processor allows for high performance with low power consumption. This unit assists in achieving and monitoring LTC (Long-Term-Care) and continuous care for chronic diseases and other treatment paradigms.

Medical Computing Platform (ONYX Series)

The AAEON ONYX series provides a wide breadth of low-noise, medically certified, professional Medical PC's. Whether it is for medical equipment, data & image management, or nurse care information terminals, our ONYX product line can help with almost any medical related application.

Fanless Operator Panel (OMNI Series)

With a unique combination of features such as touch screen, Ethernet, and fanless CPU design, the AAEON OMNI series presents a slim, light, economic, but reliable human machine interface. This line ranges from 6" to 15" screens and fits easily in applications for kiosks, machinery, factory monitoring stations, and building automation.

Robust Panel PC

AAEON Robust Panel PC is an IP-65/ NEMA-4 Panel PC with aluminum housing protection. With IP-65 certification and excellent performance, it also features water and dust proof protection for longevity even in harsh and dirty environments. This is the perfect fit for applications such as factory automation, food & pharmacy, production line packing conveyor, automated testing equipment, etc.

Fanless Embedded Controller Platform (BOXER Series)

The Boxer Series provides a full line of varied embedded controllers from all sizes to help your project succeed in the field of transportation, entertainment, environmental and industrial facility monitoring, building automation, and other relevant IPC areas.

Industrial Monitor

AAEON high brightness LCD monitors have IP-65 certified metal housing and versatile mounting kits (panel, wall, VESA-arm, swing, and desktop) that allows for a flexible integration between these LCD monitors and other systems.

Multi-Purpose & Water-Proof Panel PC (FOX Series)

This 6-face IP-65 certified FOX Series offers dust & water-proof solutions to many versatile applications. It is ideal for indoor, semi-indoor, and outdoor environments such as food plant, vehicle, kiosk, and much more.
