

GeoVision for College Security at Almaty, Kazakhstan

GeoVision brings high-security to the local prestigious university. Ronex security, an official distributor and service provider based in Almaty, Kazakhstan, implements an all-IP GeoVision security system in the furthest comprehensive level, including surveillance system, Access Control, LPR, CMS, Hotswap Recording server.

The system includes more than 500 GeoVision IP cameras (BX320/BX1500/FE2301/FD1500/SD200) covering every classroom, corridor, swimming pool, fitness center and stairwell in all nine of the district's buildings. Parking structures and outdoor premise are also se-cured with GeoVision LPR solution.

Throughout the campus, movements of any intruder can be tracked from a 360° angle and college security guides are able to watch all of it unfold in real time. Furthermore, unauthorized personnel are kept out using Geo-Vision access control that require proper identification cards at entry-ways to secure the students' and faculties' safty.
