

Withstands any load:

The new OCTOPUS family with up to 24 ports.

- First manageable IP 67 switch
- Extended management by SNMP
- Redundancy via HIPER-Ring and Rapid Spanning Tree
- Access control by IEEE 802.1X
- Mixed use with MACH and MICE possible

HIRSCHMANN

Intelligent Industrial ETHERNET solutions are conquering the field bus level.

Harsh industrial environment (IP 67)

Applications

Wherever reliable, intelligent and efficient data transmission has to be guaranteed under extreme conditions, the OCTOPUS family is at home: Not only at the field level, in factory and process automation, but also in trains or on board ships.

Regardless of whether it needs to withstand great mechanical stress, moisture and condensation, dirt, dust or vibrations – the OCTOPUS family is always able to monitor a HIPER-Ring and send status messages to the central management, for example.

Product features

The new OCTOPUS family, which complies with all the relevant industrial standards, unites the advantages of the robust IP 67 design with those of the managed Hirschmann switches. The OCTOPUS 8/16/24 have the intelligence and all functional characteristics of the modular MICE series and can therefore be implemented in a mixed environment of modular devices, permanently installed Rail Switches and open mounted IP 67 switches.

- Standardized 4-pin-M12-D technology for the connection of terminating equipment
- Totally encapsulated design
- Management via SNMP v1, v2, v3, Web GUI or TELNET
- Support for autoconfiguration adapter
- Redundancy mechanisms such as Rapid Spanning Tree and HIPER-Ring
- Access check according to IEEE 802.1X
- Filter possibilities per port

- Flow control with prioritization and traffic shaping
- Fast commissioning according to the plug & play principle
- Redundant power supply for high availability
- LED display for device and network status
- External signaling of alarms via signal contact
- Compatible with PROFINET, EtherNet/IP, Modbus TCP etc.

Due to their compact design, the products of the OCTOPUS family can be mounted either on the wall or directly on the machine. The IP 67 variants of the proven manageable Hirschmann switches have either 8/16/24 twisted pair ports, designed in standardized 4-pin-M12-D technology. Since the switches can be cascaded as you wish, networks with a distributed structure and short transmission distances to the terminating equipment can be implemented. Optionally the 16 and 24 port versions are available with 2 uplink ports 100BASE-FX (*microFX*).

Hirschmann Competence Center

If not only products but also economical total solutions are sought, the Hirschmann Competence Center is the right place to contact. Here you will get highly qualified consulting, service and support

from the pioneer in industrial network technology. Contact us about your individual requirements.

www.hicomcenter.com

A real OCTOPUS is not easily shaken.

Robust design

- Die-cast metal housing
- Screwed housing base
- Can be screwed directly to the machine

Efficient connection technology

- Fast and uncomplicated assembly
- Few parts
- Captive gasket

Autoconfiguration

- USB support via ACA 21-M12 connector
- Saves several versions of the configuration data and operating software of connected switches
- Simple commissioning
- Fast exchange of manageable switches

Extensive functions

- HIPER-Ring and Rapid STP
- Packet filter (ACL)
- SNMP v3
- IEEE 802.1X ... and a lot more besides

High cost effectiveness

- No special data distributor required
- Low wiring costs through optimized cable lengths
- Time saved by assembly on site
- Increased flexibility without fixed data installation sockets

HIPER-Ring

- Optional fiberoptic uplinks with *microFX* connectors

Requirements and solutions

In future, standardized, low-cost transmission technologies such as Industrial ETHERNET and IP will increasingly be used in the close-to-machine process levels which were previously clearly dominated by field bus systems such as Profibus, CAN or Interbus. The prerequisite for this is Industrial ETHERNET components which are able to cope with harsh factory floor conditions, and operate there fault-free over the long term.

In addition to an IP 67 switch, an appropriately robust and compact M12 connector is required to guarantee reliable real time transmission with high availability. At the same time, high installation and wiring costs can be reduced by using switches directly in the field. But this demands the appropriate intelligent, manageable Industrial ETHERNET

switches which are also able to provide redundancy mechanisms such as HIPER-Ring or access control according to IEEE 802.1X.

With the new OCTOPUS family, the first manageable switches at the field level, Hirschmann offers the optimum solution. The OCTOPUS family has the necessary internal resources for extended management by SNMP, as well as prioritization and traffic shaping. This means that Industrial ETHERNET with extended scope of functions can now also be used in previously inaccessible places – without large-scale cabling.

And for the first time IP 67 switches can be integrated in ETHERNET rings to conveniently link the field level.

The OCTOPUS family

Type of product	OCTOPUS 8M	OCTOPUS 16M
Product description		
Description	Managed IP 67 switch in accordance with IEEE 802.3, store and forward switching mode, Layer 2 Software Professional, ETHERNET (10 Mbit/s) and Fast-ETHERNET (100 Mbit/s)	Managed IP 67 switch in accordance with IEEE 802.3, store and forward switching mode, Layer 2 Software Professional, ETHERNET (10 Mbit/s) and Fast-ETHERNET (100 Mbit/s)
Port type and quantity	8 x 10/100BASE-TX, M12 D coding, 4-pole, 2-pair TP cable Auto-crossing, auto-negotiation, auto-polarity	16 x 10/100BASE-TX, M12 D coding, 4-pole, 2-pair TP cable Auto-crossing, auto-negotiation, auto-polarity
Type	OCTOPUS 8M	OCTOPUS 16M
Order No.	943 931-001	943 912-001
More Interfaces		
Power supply/signaling contact	1 M12 A coding 5-pin connector	1 M12 A coding 5-pin connector
V.24 interface	1 M12 A coding 4-pin socket	1 M12 A coding 4-pin socket
USB interface	1 M12 A coding 5-pin socket	1 M12 A coding 5-pin socket
Network size – length of cable		
Twisted pair (TP)	0–100 m	0–100 m
Multimode fiber (MM) 50/125 µm		
Multimode fiber (MM) 62.5/125 µm		
Network size – cascading		
Line/star topology	Any	Any
Ring structure (HIPER-Ring)	50 (reconfiguration time <0.5 sec.)	50 (reconfiguration time <0.5 sec.)
Power requirements		
Operating voltage	9.6 up to 60 V DC	9.6 up to 60 V DC
Power consumption	max. 6.2 W	max. 9.5 W
Current consumption at 24 V DC	200 mA	380 mA
Service		
Management	Serial interface, Web Interface, SNMP V1/V2/V3, LLDP (HiVision/Industrial HiVision)	Serial interface, Web Interface, SNMP V1/V2/V3, LLDP (HiVision/Industrial HiVision)
Diagnostics	LEDs (Power 1, Power 2, link status, data, redundancy manager, error) cable tester, signal contact (24 V DC/1A), RMON (statistics, history, alarms, events) Syslog, Port mirroring	LEDs (Power 1, Power 2, link status, data, redundancy manager, error) cable tester, signal contact (24 V DC/1A), RMON (statistics, history, alarms, events) Syslog, Port mirroring
Configuration	Command Line Interface (CLI), autoconfiguration adapter (ACA21-M12), TELNET, BootP, DHCP Option 82, HiDiscovery	Command Line Interface (CLI), autoconfiguration adapter (ACA21-M12), TELNET, BootP, DHCP Option 82, HiDiscovery
Security	Port security (MAC and IP address), SNMPv3, Access Control to Agent (VLAN/IP), 802.1x	Port security (MAC and IP address), SNMPv3, Access Control to Agent (VLAN/IP), 802.1x
Other services	QoS 4 classes, priority (IEEE 802.1D/p), VLAN (802.1Q), Multicast (IGMP Snooping/ Querier) GMRP, Broadcast limiter, Flow Control IEEE 802.3x, Topology Discovery 802.1ab, PTP (Precision Time Protocol, IEEE 1588), SNTP (Simple Network Time Protocol)	QoS 4 classes, priority (IEEE 802.1D/p), VLAN (802.1Q), Multicast (IGMP Snooping/ Querier) GMRP, Broadcast limiter, Flow Control IEEE 802.3x, Topology Discovery 802.1ab, PTP (Precision Time Protocol, IEEE 1588), SNTP (Simple Network Time Protocol)
Prepared for	ACL, Traffic Shaping, Link Aggregation 802.1ad, MSTP 802.1s	ACL, Traffic Shaping, Link Aggregation 802.1ad, MSTP 802.1s
Redundancy		
Redundancy functions	HIPER-Ring (ring structure), RSTP (Rapid Spanning Tree Protocol), redundant network/ring coupling, (master/receiver), dual homing (master/receiver), redundant 24 V power supply	HIPER-Ring (ring structure), RSTP (Rapid Spanning Tree Protocol), redundant network/ring coupling, (master/receiver), dual homing (master/receiver), redundant 24 V power supply
Ambient conditions		
Operating temperature	–40° C up to +70° C	–40° C up to +70° C
Storage/transport temperature	–40° C up to +85° C	–40° C up to +85° C
MTBF		
Mechanical construction		
Dimensions (W x H x D)	184 mm x 189 mm x 70 mm	261 mm x 189 mm x 70 mm
Mounting	Wall mounting, DIN rail mounting with adapter	Wall mounting, DIN rail mounting with adapter
Weight	1510 g	2020 g
Protection class	IP 67	IP 67
Mechanical stability		
IEC 60068-2-27 shock	15 g, 11 ms duration, 18 shocks	15 g, 11 ms duration, 18 shocks
