

ReportWorX[™] Microsoft .net

Enterprise Reporting, Charting and Analysis Software

"Turn Data into Manufacturing Intelligence"

Advanced Reporting has never been easier! Looking for a powerful reporting tool that is easy to learn, quick to apply and works with any data source? Producing reports complements and finalizes any project. ReportWorX is the ideal tool for creating, scheduling and redirecting reports to be sent to redundant printers, faxes, computer screens, PDF files, local or remote disk drives. Even publish reports to a Web server or send them to your entire organization via e-mail!

Connect and data mine to any data source. Using ICONICS' data integrator technology, ReportWorX integrates with any data source such as Microsoft® SQL Server, MSDE, Microsoft Access, Oracle®, SAP, HMIs, SCADA systems, custom databases and more. Integrate information from real-time OPC data sources, historical databases as well as .NET Web Services.

Web-Enable your reports. Reports can be automatically published to Web Servers so that any user can access reports with a standard Web browser over the Internet or within a secure corporate intranet.
