ICONICS, DVT Announce Cooperative Agreement

Development Agreement To Enable DVT Products for OPC

Phoenix, AZ – November 4, 2003 — **ICONICS**, a leader in the development of OPC connectivity and Web-enabled industrial automation and business visualization software for Microsoft® Windows® operating systems, along with DVT Corporation today announced a technology agreement to OPC-enable DVT products. Adding this open connectivity standard will allow DVT products to integrate with other OPC-compliant products.

OPC stands for Interoperability for Process Control, and is the fastest growing standard for the exchange of real-time manufacturing and process control data. "This cooperative agreement with ICONICS opens the OPC world to DVT," states Bob Settle, Director of Marketing for DVT. "Our customers will benefit by the ability to bypass custom interfaces and drivers through the use of OPC."

In this cooperative agreement, ICONICS and DVT will work together on coordinated marketing programs. "DVT's leadership in the field of machine vision, coupled with ICONICS' leadership in OPC-enabled, HMI/SCADA visualization technology for industrial automation, allows our companies to deliver an innovative and robust customer solution," says Russ Agrusa, President and CEO of ICONICS.

All ICONICS servers conform to the latest OPC specifications for real-time data, alarms, and events, including OPC Data Access (DA) 3.0 and OPC XML DA 1.0. The ICONICS OPC ToolSuite™ is the industry's first suite of OPC tools that integrates OPC Data Access, OPC XML, and OPC Alarm and Events in one toolkit. OPC technology allows users to connect components from different manufacturers to communicate with each other through a common

protocol. The ICONICS OPC server technology will allow DVT cameras to receive communications from a variety of components through a single source, resulting in a more powerful system.

“Last week at the ISA show in Houston, TX, ICONICS and DVT were able to finalize the cooperative agreement,” states Tim Donaldson, Marketing Manager for ICONICS. “This is a great example of how two leaders can work together to provide a comprehensive solution. Using the ISA forum, we were able to collaborate and make this cooperative agreement real.”

“Visualize your Enterprise™”

ICONICS Background Information

Founded in 1986, ICONICS is a leader in the development of Web-enabled industrial automation software for Microsoft® Windows® operating systems. Offering the industry's only suite of fully-integrated OPC-based components and products, GENESIS32™ Enterprise Edition is available for Windows XP, 95, 98, Millennium, and 2000, and Windows NT®. Pocket GENESIS™ for Windows CE and Pocket PC was built from the ground up based on ICONICS' OPC-To-The-Core™ framework. ICONICS offers a complete set of Plug and Play automation components, including best-in-class OPC ActiveX® Controls, OPC Toolkit, Human Machine Interface (HMI), Microsoft SQL Server®-based data logging, Multimedia Alarming, and Supervisory Control and Data Acquisition (SCADA) products. ICONICS is represented in over 50 countries and has in excess of 100,000 product installations worldwide. For more information contact ICONICS at (508) 543-8600, or visit us online at www.iconics.com.

DVT Background Information

Headquartered in Duluth, GA, DVT Corporation's core value system is based on the concept of Servant Leadership. Instead of asking, “What's in it for me?” a Servant Leader would ask, “How may I serve you?”. DVT's corporate mission is based on the concept of Servant Leadership, which means putting the needs of others ahead of your own. DVT puts the needs of its customers and partners ahead of its own needs. For more information contact DVT Corporation at (770) 814-7920, or visit DVT online at www.dvtsensors.com.
