ICONICS GENESIS32 Version 6.1 Adds Revolutionary Automation Features

INTERPHEX, New York, NY April 17, 2002 — ICONICS, a leader in the development of web-enabled industrial automation software for the Microsoft Windows Operating Systems, recently released version 6.1 of its award-winning GENESIS32 suite of HMI/SCADA tools. New features include:

FDA compliance has been added to help customers comply with FDA 21 CFR Part 11, the regulation for reporting practices and record keeping.

Language switching, designed for OEMs and machine builders, provides language-switching capabilities for use in graphical displays, alarms, trends, historical alarms and texts – all at the touch of a button. Engineering units easily switch from metric to English units and vice versa.

WebHMI™ has improved Internet and Web capabilities including multipage Web publishing. Internet-enabled automation is achieved through **GenBroker™**, a new feature that enables GENESIS32 components to communicate over intranets and the Internet, as well as through routers and firewalls.

Multimedia alarming notifies users of an occurring alarm, wherever they may be, via two-way pagers, fax, video, telephone, e-mail, pop-up windows, marquee messages on remote PCs, cell phones, local audio and voice annunciation via text-to-speech.

Trending features offer complete support and optimized real-time data logging to Microsoft SQL Server®, Oracle®, and MSDE databases, and supports the attachment of operator comments to those database records. The TrendWorX™32 Viewer ActiveX control can plot historical data alongside live OPC data.

Windows NT®/2000 Terminal Server has also been added to support an additional method for thin-client connectivity.

Users and OEMs may visit the ICONICS website at **www.iconics.com** to request a **FREE** demo version of the GENESIS32 6.1 development system. The development CD also includes:

- Two-hour run-time license for visualization and graphics including Visual Basic® for Applications Wizards, trending, alarming, scripting, OPC server redundancy, popular OPC servers, Web-based HMI/SCADA, and many useful automation utilities.
- Complete system documentation
- Technical white papers
- Multimedia tutorials

For more information, please contact ICONICS at (508) 543-8600 or info@iconics.com, or visit the ICONICS Web site at **www.iconics.com**.

ICONICS Background Information

Founded in 1986, ICONICS is a leader in the development of Web-enabled industrial automation software for Microsoft® Windows® operating systems. Offering the industry's only suite of fully-integrated OPC-based components and products, GENESIS32™ Enterprise Edition is available for Windows XP, 95, 98, Millennium, and 2000, and Windows NT®. Pocket GENESIS™ for Windows CE and Pocket PC was built from the ground up based on ICONICS' OPC-To-The-Core™ framework. ICONICS offers a complete set of Plug and Play automation components, including best-in-class OPC ActiveX® Controls, OPC Toolkit, Human Machine Interface (HMI), Microsoft SQL Server®-based data logging, Multimedia Alarming, and Supervisory Control and Data Acquisition (SCADA) products. ICONICS is represented in over 50 countries and has in excess of 75,000 product installations worldwide. Visit us online at www.iconics.com.
