ICONICS Pocket GENESIS

Adds Alarm and Database Support for Pocket PC

ISA Expo 2001 – September 11, 2001 — ICONICS, a leader in the development of Web-enabled industrial automation software for Microsoft® Windows® operating systems, today unveiled Pocket PC™ support for its entire suite of Pocket GENESIS™ products. Announced recently by Microsoft® Corporation, Pocket PCs are small, energy-efficient and powerful Personal Digital Assistants (PDAs) that not only store calendar and contact information, but also come equipped with applications that let you take your important work with you. These applications are specially developed "Pocket" versions of Microsoft Internet Explorer™, Microsoft Outlook®, Microsoft Word™ and Microsoft Excel™. People who carry Pocket PCs are able to send e-mail, edit documents and access important business information. With ICONICS' announcement today, this important business information can now include HMI/SCADA operator displays, reports, trends and alarm-management data for your plant or facility.

Pocket GENESIS, Pocket PCs and wireless communications make a great team. Together they address a fast-growing and critical market niche in factories and plants worldwide, providing instant access to real-time manufacturing data, anytime and anywhere the user may be.

Comments Russ Agrusa, President of ICONICS, "Consider the recent announcements of major, global manufacturers replacing thousands of employee workstations with laptops to increase worker productivity. At the same time, PDAs have made it into the corporate mainstream. Businesses are increasingly 'going mobile'."

Pocket GENESIS provides three industrial productivity applications for the Pocket PC. The first of the scalable applications is Pocket GraphWorX™, for performing advanced HMI functions. The second is Pocket AlarmWorX™, which provides traditional alarming and acknowledgment

capabilities using the OPC Data Access and OPC Alarm and Events “Plug and Play” standards. Also included is Pocket TrendWorX™, which replays real-time and historical data in a number of trend chart display formats. Pocket PCs integrate with corporate databases such as MS SQL, MSDE and Microsoft Access™ to place information at your fingertips, wherever you may be.

Also included with the suite of applications is Industrial DCOM. ICONICS Pocket GENESIS can network using LAN, WAN, Internet/intranet or wireless communications with virtually any third-party enterprise productivity application or manufacturing execution system (MES).

Peter Wengert, Global Director for the Manufacturing Industry at Microsoft, comments, “ICONICS consistently demonstrates leadership and a commitment toward developing scalable, relevant applications that incorporate the most current technology available and are based upon open industry standards. Pocket GENESIS is an excellent example of this commitment.”

Pocket GENESIS is a Windows CE, full 32-bit, multi-threaded, distributed client/server application that is based on ICONICS’ powerful OPC-To-The-Core™ technology. The product is compliant with the OPC Data Access (DA), OPC Alarm and Events (AE) and Historical Data Access (HDA) specifications. Pocket GENESIS for Pocket PC is an ideal solution for quality managers, production personnel, maintenance supervisors, service fleets and building/facility operators.

ICONICS Background Information

Founded in 1986, ICONICS is a leader in the development of industrial automation software for Microsoft® Windows® Operating Systems. The company offers the industry’s only suite of fully integrated OPC-Based components and products: GENESIS32™ Enterprise Edition, available for Windows 95/98/NT, Millennium and 2000; and Pocket GENESIS™ available for the Pocket PC and Windows CE. Both were built from the ground up based on ICONICS’ OPC-To-The-Core™ framework. ICONICS offers a complete set of “Plug and Play” automation components including Best-in-Class OPC ActiveX Controls, OPC Toolkit, Human Machine Interface (HMI), SQL based Data Logging and Supervisory Control and Data Acquisition (SCADA) products. The company’s products are fully WEB enabled. ICONICS is represented in over 50 countries and has in excess of 50,000 product installations worldwide. For more information visit www.iconics.com, or E-mail to info@iconics.com.
