

Description: This application note explains the upgrade procedure to upgrade from one GENESIS32 version to another, when using a HardKey.

OS Requirement: Windows NT, 2000, XP, 2003

General Requirement: Knowledge of ICONICS GENESIS32

GENESIS32 HardKey Field Upgrade Utility

If you have been using an earlier GENESIS32 version, such as version 7.1, and would like to upgrade your HardKey to a current GENESIS32 version, such as 8.0, the following steps will guide you through the upgrade process.

1. Obtain the HardKey Field Upgrade Utility (HWKUpdate.exe) from ICONICS.
2. Copy HWKUpdate.exe to the directory containing the ICONICS License Utility. By default, this would be within the folder ...\\Program Files\\ICONICS\\Softlic.
3. Run HWKUpdate.exe so that the dialog appears as shown in Figure 1.

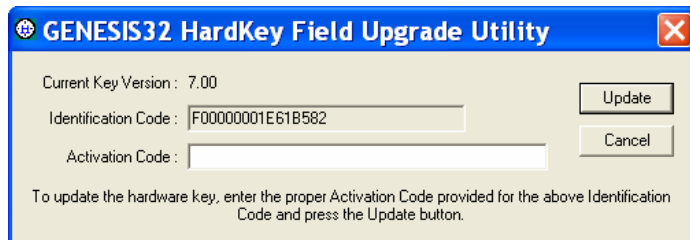

Figure 1

4. Report the Identification Code to ICONICS to obtain a corresponding Activation Code.

5. Enter the Activation Code provided by ICONICS and press Update as shown in Figure 2.

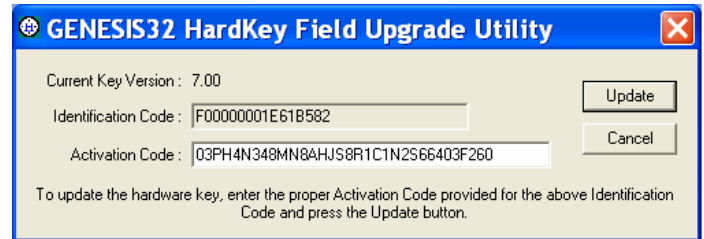

Figure 2

6. Upon completion of the HardKey update, a confirmation dialog will be shown as in Figure 3.

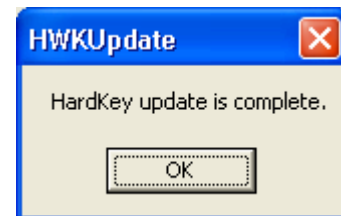

Figure 3

7. If the ICONICS License Service was running prior to the upgrade, restart the license service by rebooting the PC or by using the Service Control Manager to stop and restart the service.
