

Update 1 for 10.9 - ISO

This hot fix pack contains:

- **10.9 Update 1:** Fixes for GENESIS64, AnalytiX, MobileHMI and Hyper Historian version 10.9 Update 1.
- **10.9 (x86) Update 1:** Fixes for the 32-bit Hyper Historian pieces (Collector and SQL Query Engine) version 10.9 Update 1
- **AzureConnector:** A standalone installation for the Azure Cloud Connector, version 10.91.
 - Note: For instructions on how to set up HTTPS for the Azure Cloud Connector, see "Azure Certificates.pdf", located inside the hot fix zip file.
 - Note: If you already have GENESIS64, Hyper Historian, AnalytiX, or MobileHMI installed you do not need the AzureConnector. Do not run the AzureConnector installation on a system that already has any other ICONICS 10.x products.

Notes:

- This is an ISO file that is a combination of all other 10.9 Update 1 files. You do not need to download the remaining 10.9 Update 1 files if you choose to download this ISO.
