Make the Invisible Visible™

New Features

Stability and Fixes

Update 5 for 10.95 was designed mostly to improve stability and address issues. There is a single new feature, listed below. For all other changes, see the "Resolved Issues" document for Update 5.

AlarmWorX64 Viewer

Description

You can now execute commands from the AlarmWorX64 Viewer by clicking anywhere on a row instead of just in a particular cell. (This is the same functionality that was added to the GridWorX Viewer in 10.95 Update 4 with reference ID: 59012.)

Use

Edit your AlarmWorX64 Viewer, select the Grid, and go to the Behavior tab. Deselect "Allow Multiple Selection". (This feature can only be used when selecting a single row at a time.) Then go to the Advanced tab. Look in the "Grid" section, and set this property:

SelectionCommandColumnKey – This sets the command to be executed when the row is clicked. This property takes the name of a column. The column must have "Contains a clickable link" checked on the Columns tab. The column does not need to be visible.

In version 10.95.5, the SelectionCommandColumnKey property is only available via the Advanced tab, but we plan to better integrate it into the GUI in 10.96.

(Reference ID: 67024)

Founded in 1986, ICONICS is an award-winning independent software provider offering real-time visualization, HMI/SCADA, energy management, fault detection, manufacturing intelligence, MES, and a suite of analytics solutions for operational excellence. ICONICS solutions are installed in 70 percent of the Global 500 companies around the world, helping customers to be more profitable, agile and efficient, to improve quality, and to be more sustainable.

ICONICS is leading the way in cloud-based solutions with its HMI/SCADA, analytics, mobile and data historian to help its customers embrace the Internet of Things (IoT). ICONICS products are used in manufacturing, building automation, oil and gas, renewable energy, utilities, water and wastewater, pharmaceuticals, automotive, and many other industries. ICONICS' advanced visualization, productivity, and sustainability solutions are built on its flagship products: GENESIS64™ HMI/SCADA, Hyper Historian™ plant historian, AnalytiX® solution suite, and MobileHMI™ mobile apps. Delivering information anytime, anywhere, ICONICS' solutions scale from the smallest standalone embedded projects to the largest enterprise applications.

ICONICS promotes an international culture of innovation, creativity, and excellence in product design, development, technical support, training, sales, and consulting services for end users, systems integrators, OEMs, and channel partners. ICONICS has over 350,000 applications installed in multiple industries worldwide.
