

Licensing – License Upgrade from v7.x to v8.0

APPLICATIONS NOTE

August 2004

Description: Guide to upgrading a software license from v7.x to v8.0.

OS Requirement: The operating system required is Windows Server 2003 / WinXP / Win2000Pro and WinNT.

General Requirement: GENESIS32 v8.0 and Software Licensing v8.0 installed.

Upgrade Instructions

1. **Fig. 1** shows an active GENESIS32 v7.x software license.

Fig. 1: v7.x Software License

2. When upgrading GENESIS32 v7.x to v8.0, you will also be required to upgrade the v7.x License Utility to v8.0. **Fig. 2** shows the message that will appear during installation informing the user of this.

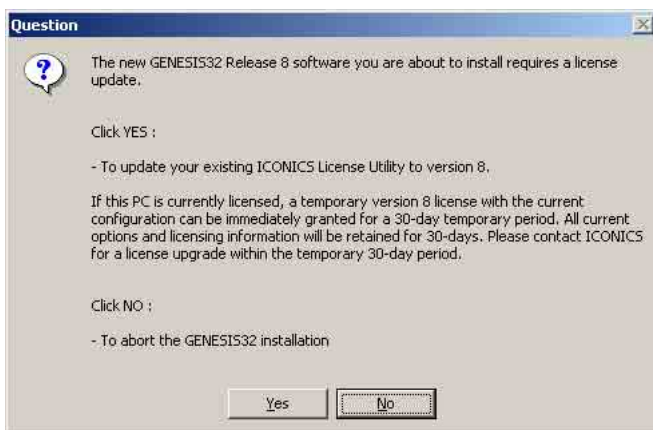

Fig. 2: Upgrade from v7.x to v8.0 During Installation

3. Follow the 8.0 Software Licensing installation steps.

4. At the end of the successful install, you will be asked to restart the machine.

NOTE: This system restart is required!

5. After the system restart, run the **License Utility** from **Start → Programs → ICONICS Software Licensing**.
6. Follow the instructions guiding you through the upgrade process.
7. The upgrade will revert the v7.x permanent license that you had active to a v8.0 30-day temporary license.

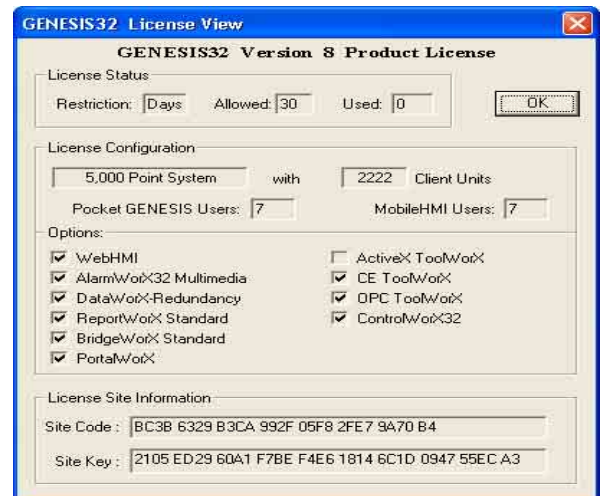

Fig. 3: v8.0 Temporary Software License

8. You will need to get a new v8.0 permanent software key from ICONICS by going to **Actions → Register for a License**. Select “Express Web Site Registration via internet” to use the ICONICS Web Licensing server. Log in and select “Add products to an existing license”. Alt-Tab to obtain current Site Code. Using your Product Registration Number, enter your existing Site Key and new v8.0 Site Code and add the **UPGEN32 V7 to V8** (v8.0 Upgrade) to your existing products to generate your new v8.0 Site Key. Enter your new Site Key and click the Update button, as in **Fig. 4**.
