

GENESIS32 - Upgrading from v 7.x to v 8

APPLICATIONS NOTE

August 2004

Description: This application note explains the upgrade procedure from GENESIS32 V7.x to GENESIS32 V8

OS Requirement: Windows NT/2000/ XP/ 2003

General Requirement: Knowledge of ICONICS GENESIS32

GENESIS32 Upgrade from V7.x to V8

This application covers upgrading from GENESIS32 V7.0 or V7.1, to GENESIS32 V8. The following steps will guide you through the upgrade process.

1. Insert the ICONICS GENESIS32 V8.CD into the CD-ROM drive and the auto run will start. Click on GENESIS32 and the following message will come up informing you of a different version of GENESIS32 on the target machine. Read the message and click YES to Uninstall V7.x of GENESIS32.

Note: Before Un-installing GENESIS32 V7.x, if you have any files you would like to keep located under GENESIS32 folder; back them up to a different location.

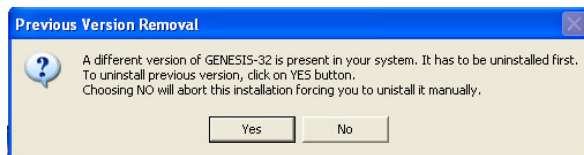

Figure 1

2. The next window will ask for confirmation to completely un-install the previous version of the product. Click YES.

Figure 2

3. Un-install process starts as in figure below

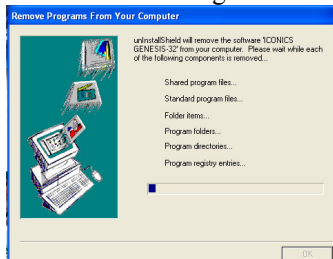

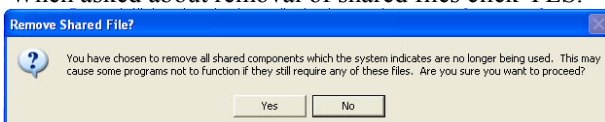

Figure 3

4. When asked about removal of shared files click YES.

5. The next windows will confirm the deletion of all V7.x files.

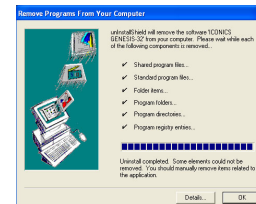

Figure 5

6. Click OK on the message that confirms complete removal of GENESIS32 V7.x

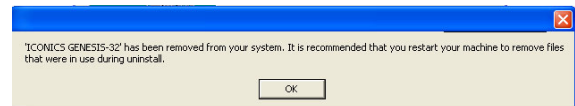

Figure 6

7. **Reboot** the machine.
8. Insert the GENESIS32 V8 CD into the CD-ROM drive (if the CD is already in, eject it and insert it back). The auto install will now detect the V7.x software license and will ask if you would like to upgrade, click YES.

Note: Once you upgrade your license you cannot undo it. Your existing permanent license will be changed to a 30-day temporary license with all the options unless you have a V8 license.

9. GENESIS32 V8 Software License will start installing.

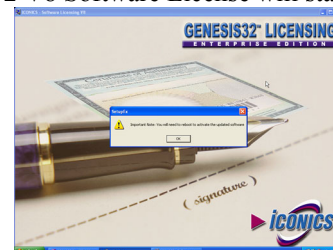

Figure 8

10. After you install the V8 license, reboot the machine again.
11. Insert the GENESIS32 V8 CD again into the CD-ROM drive (if the CD is already in, eject it and insert it back). The auto install will now begin and prompt you through the installation of GENESIS32 V8.
