

Description: Guide to using the Script Wizards in GraphWorX32

OS Requirement: Win 2000 Pro/Server, XP Pro, Server 2003

General Requirement: GraphWorX32 must be installed

Introduction

There are many symbols in the GraphWorX32 Symbols Library. These symbols offer a simple way to create Graphics and even scripts. This document will describe how to get help when you are using one of the VB or VBA script wizards.

Help Wizards

- Open GraphWorX32 by going to Start → Programs → ICONICS GENESIS32 → GraphWorX32 → GraphWorX32
- If the Symbols Toolbar is not already enabled, go to View → Toggle Symbol Toolbar to bring up the Symbols Library. You can also go to View → Toolbars and then check Symbols to bring up the Symbols Toolbar.

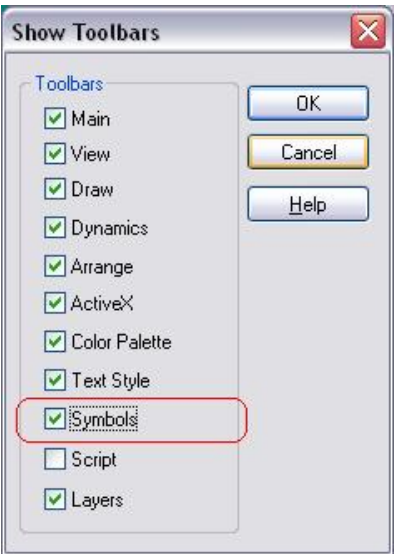

Figure 1 - Show Toolbars Dialog

- At the root of the library, double-click on 3_scriptwizards, you should see a few .sdf files.
- Double-click on either “VB Script Wizards.sdf” or “VBA Wizard Symbols.sdf”
- Depending on which library path you have chosen in step 4, you would either see “VB Script Wizards Help” or “VBA Wizards Symbols Help”. Select it, and drag it into the GraphWorX32 working area.
- Double-click on the button that you have dragged into your working area. This will bring up a menu of help files, when

click on the buttons in this menu, the corresponding help file will come up to aid you in using that particular wizard.

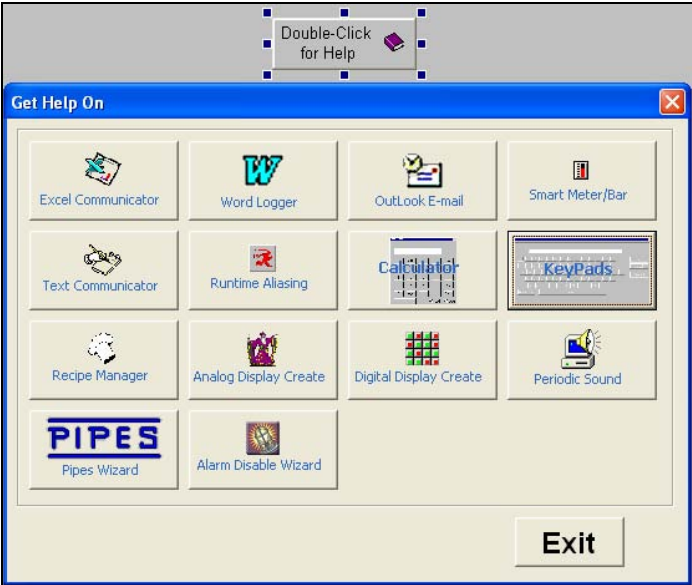

Figure 2 - VBA Script Wizards Help

- Table 1 shows a list of help files in both the VB Script Wizard and the VBA Wizard Symbols.

Table 1 - List of Help Files in Each Wizard
